

There are a handful of people who own and run all the radio stations in America. Now these people have some competition and they don't like it. I am so tired of a few crying men getting their way all the time. It's time for some change and fair play. XM is breaking no laws. All traffic and weather gets broadcast to every city for all the coverage. The broadcasts are NOT local! Shame on the NAB for complaining and serving the community a lousy product. Satellite radio exists for a reason: the people are tired of FM radio. If the NAB would give us a good product we wouldn't stray. They have failed us. Please allow XM to succeed and give us traffic and weather reports. It's the only option for me to take a stand against the NAB. Now I have a choice. I choose XM!!!
